

POLICY FOR THE SUBMISSION OF MANUSCRIPTS TO BE PUBLISHED IN THE GLOBAL & LOCAL ECONOMIC REVIEW

1. PRELIMINARY INSTRUCTIONS

For a manuscript to be accepted for publication in the Review, authors are required to abide by the following publication rules. In particular, authors must state that: the manuscript, or relevant parts of the manuscripts, was not previously published; the manuscript is not simultaneously under review by any other journal; the manuscript will be not submitted elsewhere before the final outcome of peer-reviewing process by the Scientific Board.

2. MANUSCRIPTS SUBMISSION

Manuscripts must be sent to the Scientific Board by e-mail attachment to gler@fondazionepecarabruzzo.it. Papers, which must be submitted in printable formats, should include the manuscript text, footnotes, a bibliography, an abstract (both in Italian and in English) not longer than 300 words in length and the JEL code (available on <http://www.aeaweb.org/journal/elclasjn.html>).

Manuscripts written in English are also publishable, but it is the author's responsibility to ensure that papers are written in clear and comprehensible English, especially if they do not adhere to linguistic standards.

Institutional affiliation, telephone number and the e-mail address of the author (or the corresponding author in case of multiple authorship) should be placed on the first page of the manuscript.

All manuscripts should follow the format specified in the section "Instructions for authors", available on the Review website www.gler.it.

3. REVIEWING PROCESS

The manuscript is reviewed by the Scientific Board and, if judged suitable for publication in the Review, is then sent to three referees for a rigorous blind peer-reviewing process.

The initial decision by the Scientific Board takes 2 weeks.

Authors will be informed of the review decision and all relevant comments by the three referees within approximately a month.

Based on the referee's recommendations, the Scientific Board then decides whether the paper should be accepted as it is, revised or rejected. In any case, authors will be provided with a feedback.

In case of acceptance by the Scientific Board, the publication process will begin by assigning the manuscript to a number and a year of the Review.

Proof corrections and the printing process takes approximately a month.

4. MISCELLANEOUS

Authors submitting manuscripts to the Review are expected to be available for contributing as referees, in the event they would be so requested.

The articles published on Global & Local Economic Review will be listed in the ECONLIT and E-JEL bibliographies.

In the latest centuries, generally speaking, history records the alternation of some important seasons which lend themselves to represent economic models, which are the bases of modern economic thought.

First of all, there is the age of *colonial economy* centered on the role of imperial states, together with the birth of monopolistic companies, in the management of trades with dominion areas.

Then, the age of *international economy* was lived, culminating in the second post war trade relation system. It was mainly founded on the functions of the national states and their authorities to support both national expansionary fiscal policy and exchange clearings, in their trade ratios with the rest of the world.

At last, in the latest years, *interglobal economy* took vehemently the lead through the modern electronic infrastructures of telematic and telecommunications.

As the former models, the *interglobal economy* too does not automatically assure either stable equilibrium or the overcoming of traditional crises.

It gives benefits and disadvantages too.

From the normative and positive points of view, one of the disadvantages which most drew the attention of researchers is the weakening and disappearance of national and subnational economic and monetary policy instruments.

Instead one of the benefits which most attracted interest might be located on the nature itself of the technological revolution in progress, foreboding new opportunities in the integration process of local economic systems, which might qualify themselves as network growth links (or growth poles?).

The Review has the aim to represent and to inquire the normative and positive profiles of the fundamentals which might characterize the thin and difficult frontier between globalization and economic localism.
